ABOUT

Software Developer with experience designing and building responsive web applications and practical software systems. Currently studying Computer Science at LASU FCIT. Experienced in frontend development, PHP/MySQL applications, and Python/Flask systems. Focused on building clean interfaces, role-based workflows, and maintainable systems for both client and academic use.

TECHNICAL SKILLS

Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP, Python, SQL, Frontend Development

Frameworks: React.js, Tailwind CSS, Remix/React Router, Vite, Flask

Tools: Git, GitHub, MySQL, PDO, OpenCV, Vercel, Render

EXPERIENCE

Independent

2026 - Present

Freelance Software / Frontend Developer

- Built responsive websites and web applications for client and academic use.
- Developed frontend interfaces as well as PHP/MySQL application workflows where required.
- Worked with modern responsive design, Git-based development, and web deployment.

LASU FCIT

Oct 2025 - Dec 2025

Frontend Development Intern

- Assisted during HTML, CSS, and jQuery practical sessions.
- Built responsive web pages and a landing-page project.
- Supported students during practical classes while gaining experience with jQuery and basic PHP.

PROJECTS

Examination Management System

PHP, MySQL, Tailwind CSS, JavaScript

- Built a secure examination-question workflow system for LASU FCIT managing question submission, moderation, approval, lockdown, audit history, and controlled printing.
- Modeled the workflow around Lecturer → Moderator → HOD and Exam Officer responsibilities to ensure accountability.
- Implemented AES-256-GCM-based protection for the document lifecycle and restricted printing to authorized periods.

Shoheed Schools Management System

PHP, MySQL, Tailwind CSS, JavaScript

- Developed a multi-role school management platform for handling students, staff, academic sessions, subject assignments, and results.
- Designed a workflow-driven results pipeline (DRAFT → SUBMITTED → VERIFIED → APPROVED → PUBLISHED).
- Implemented session-aware assignments and explicit capability-based teaching permissions instead of generic roles.

ICAPES (Intelligent Context-Aware Photo Enhancement)

Python, Flask, OpenCV, scikit-image, MySQL

- Built a context-aware photo enhancement application that analyzes image characteristics and dynamically selects enhancement operations.
- Created an analysis pipeline to measure brightness, contrast, noise, sharpness, and saturation using normalized metrics before applying corrections.

EDUCATION

Lagos State University (LASU FCIT)

Expected 2027

Diploma, Computer Science

ADDITIONAL

Interests: UI/UX design, building accessible web interfaces, and contributing to software tooling.
